Karur, Tamilnadu – 639 119

OBJECTIVE

A passionate and dedicated Biomedical Engineering graduate seeking to work in a growth-oriented environment where I can apply my technical skills and knowledge to contribute to innovative healthcare solutions.

TECHNICAL SKILLS

- C Programming
- Python(basics)
- MS Word
- Powerpoint
- Blynk
- Arduino

CERTIFICATIONS

- NPTEL: Enclosure Design of Electronics Equipments – Jul-Oct 2024
- Value Added Course: Biomedical Hardware Training, Medical Coding
- Spoken Tutorial: Arduino Training

CO-CURRICULAR ACTIVITIES

Participated In various Paper presentations, seminars, webinars and workshops in various colleges.

EXTRA- CURRICULAR ACTIVITIES

- Successfully organized college symposium
- Successfully organized college hackathon
- Active member of ISTE and Energy Club
- Successfully organized an College IV

LANGUAGES KNOWN

- Tamil – Native
- English - Fluent

AREA OF INTEREST

- Biomedical Instrumentation
- Pytotherapy

PERSONAL SKILLS

- Empathy
- Willingness to Learn
- Troubleshooting

EDUCATION

Kongunadu College of Engineering and Technology, Thottiyam.
B.E-Biomedical Engineering – 75% 2021-2025

Karur Sri Ramakrishna Vidhyalaya Higher Secondary School, Kovakkulam.
HSC - 82.6% 2020-2021
SSLC - 81.6% 2018-2019

ACADEMIC PROJECTS

1. **Title: Heart Attack Detection System**
   Used: Blynk, Heart rate Sensor
   Description: The objective of the "Heart attack detection system" is to monitor heart activity continuously and detect anomalies indicating a potential heart attack.

2. **Title: IoT Enabled Paralysis Care**
   Used: Think speak, Heart rate Sensor, Temperature Sensor
   Description: The objective of "IoT enabled paralysis care" is to enhance patient care by using IoT devices to monitor vital signs and environmental conditions.

3. **Title: Wearable Bio-Monitoring System with Integrated Conductive Textile Electrodes**
   Used: IoT Remote, SpO2 Sensor, Temperature Sensor, ECG Sensor
   Description: The objective of the "Bio-Monitoring T-Shirt" is to provide continuous, real-time monitoring of vital signs using textile electrodes and IoT, ensuring accurate health tracking, comfort, and timely alerts.

ACHIEVEMENTS

Secured second place in an intra-college hackathon conducted by the Department of Biomedical Engineering for the project **"Neonatal Incubator."**

INTERNSHIP

- Completed Internship training at Kabila Hospital for 15 days.
- Completed Internship training at Medvu for 15 days.
- Completed Hospital training at Retna Global Hospital for 15 days.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge
